

INCONEL 625 / INCONEL 718

Inconel 625 and 718 are important recyclable materials for us at Greystone Alloys. We purchase scrap to process and supply secondary processors as well as mills with revert material.

Inconel scrap recycling is a primary focus at Greystone alloys. We purchase inconel in most forms such as:

- Solids
- Turnings or Borings
- Sawing waste
- Grindings: Wet and Dry

Inconel is an important high temp material in the oil and gas, petrochemical and aerospace industries. With its resistance to harsh environments such as corrosion, oxidation; Inconel is critical component to structural integrity and safety.

Inconel 718 Alloy

Element	Avg
Carbon	.04
Nickel	52.5
Chromium	19.0
Iron	18.5
Aluminum	.5
Molybdenum	3.00
Titanium	.90
Copper	.15
Cb + Ta	5.25

Inconel 625 Alloy

Element	Avg
Carbon	.05
Nickel	61.0
Chromium	22.5
Iron	3.0
Molybdenum	9.00
Titanium	.20
Cb + Ta	3.65
Aluminum	.20
